

*AMENDMENTS TO THE CLAIMS*

This listing of claims replaces all prior versions, and listings, of claims in the application.

Claims 1-16 are cancelled.

17. (Currently Amended) A panel device having at least one housing, which comprises two panels a first panel provided with driving electronics, the panel being movable between a first position and a second position thereof, in which the panel device has at least one housing, which comprises the first panel in one of said first and second positions and at least one further panel being movable between a first position and a second position, the panels being rollable or foldable and of a different kind, said at least one housing comprises a sub-housing for each separate panel and at least one of the sub-housings being realized such that at least one of the panels is removable and replaceable by a replacement panel.

18. (Cancelled)

19. (Currently Amended) A panel device according to claim ~~18~~ 17 wherein at least one of the sub-housings ~~being~~is slidable along a first axis.

20. (Currently Amended) A panel device according to claim ~~19~~ 17 wherein at least one of the sub-housings ~~being~~is rotatable with respect to the first axis.

21. (Previously Presented) A panel device according to claim 20 in which the sub-housings have a sliding device in common.

22. (Original) A panel device according to claim 21 in which the sliding device comprises driving electronics.

23. (Currently Amended) A panel device according to claim ~~19~~ 17, in which the panels ~~being~~are rollable with respect to a common axis.

24. (Currently Amended) A panel device according to claim ~~19~~ 17, in which at least two of the sub-housings ~~being~~are rotatable with respect to each other along a first axis.

25. (Currently Amended) A panel device according to claim ~~24~~17, in which at least one ~~further~~ sub-housing ~~is being~~ rotatable ~~or foldable~~ with respect to a further axis substantially perpendicular to the first axis.

26. (Currently Amended) A panel device according to claim ~~18~~17, in which the sub-housings have a driving device in common.

27. (Currently Amended) A panel device according to claim 26, in which the driving device is rotatable.

28. (Currently Amended) A panel device according to claim ~~17~~44, in which the housing ~~comprising at least two panels~~, each separate panel ~~being~~is rollable from a separate axis.

Claims 29 – 39 (Cancelled)

40. (New) A panel device according to claim 17, in which said two panels have a different kind of application.

41. (New) A panel device according to claim 40, in which one of said two panels has a touch function and another one of said at least two panels has a display function.

42. (New) A panel device according to claim 17, in which said two panels have been realized in different technologies.

44. (New) A panel device according to claim 17, in which the housing comprises at least three panels.

45. (New) An electronic assembly comprising an electronic apparatus and the panel device according to claim 17 the electronic apparatus comprising means for providing panel parameters to an interface between the electronic apparatus and the panel device.
